

To whom it may concern:

As a taxpayer and as a consumer of the products provided by both XM Satellite Radio and local stations, I urge you to reject the limiting petition, #04-160, sponsored by the NAB. While I understand the desire local stations have to protect their niche, I reject their request to do that. Let the market speak. If a quality product is provided, then both consumers and advertisers alike will support that product. There is room and a need for both types of broadcasts. Please let us, the consumers, decide which one we want to use. Thank you.
